🐙 Yasowant

OBJECTIVE

Software Engineer (3 years) with hands-on experience in building scalable full-stack applications. Skilled in React.js, Node.js, MongoDB, and REST APIs. Passionate about problem-solving and delivering innovative, user-focused solutions while continuously learning new technologies.

SKILLS & TECHNOLOGIES

Frontend: React.js, JavaScript, TypeScript, Tailwind CSS

Backend: Node.js, Express.js, MongoDB, Supabase, Firebase

DevOps & Tools: Docker, Git & GitHub, Postman, System Design

Other: REST APIs, Authentication, Responsive Web Design

WORK EXPERIENCE

SPM Global Technologies

Software Developer

Aug-2023 - Present

Key Functionalities:

- **Designed and implemented** responsive user interfaces using **React.js**, enhancing usability and optimizing user engagement.
- **Developed and maintained RESTful APIs** with **Express.js** and **Node.js**, enabling efficient processing of complex **CPQ (Configure Price Quote)** workflows.
- **Streamlined workflows** for approvals, surveys, and pricing by crafting robust **backend logic**, minimizing manual interventions and boosting operational efficiency.

JSpiders - Training & Development institute

Internship

Sep-2022 - July-2023

During my internship at JSpiders Training & Development institute, I gained hands-on experience in full-stack E-commerce platform using **Java, React, and MongoDB**, delivering a functional application with seamless user transactions and real-time updates.

- **Enhanced user engagement** by creating **mobile-first, dynamic UI components** in **React.js**, leveraging responsive design for improved accessibility.
- **Developed scalable backend functionality** in **Java**, efficiently managing business logic and ensuring reliable server-side operations for high-demand systems.

PROJECT

AI Car Marketplace

Full-Stack Web Application | Next.js, Supabase, Prisma, ArcJet, Tailwind CSS

Live Demo: [AI Car Marketplace](#)

Key Features:

- AI-Driven Car Suggestions – Integrated **Gemini API** for personalized recommendations
- Advanced Filtering System – Search by **brand, model, price, fuel type, transmission**, and **availability**
- Car Comparison Tool – Compare cars side-by-side with **AI-powered insights**
- EMI Calculator – Estimate **monthly payments** instantly
- Test Drive Booking – Schedule **test drives** directly within the platform

Astro Landing Page - Responsive Footer Component

Designed and deployed a modern, responsive footer component using Astro, focusing on clean UI, performance, and seamless navigation.

Live Demo [Agence-X Landing Page](#)

Key Features:

- **Dynamic Navigation Links** – Organized into clear sections such as company info, support, and resources for a seamless user experience.
- **Modern Gradient Backgrounds** – Visually appealing gradients that enhance the overall design and aesthetic.
- **Social Media Integration** – Smooth hover effects to improve user interaction and increase engagement with social platforms.
- **Optimized Content** – Replaced placeholder text with meaningful, professional copy to improve readability and clarity.

ShopVibe – A Production-Ready E-commerce Application

Tech Stack: React (Vite + TypeScript), Node.js, Express.js, MongoDB Atlas, Render, Vercel, GoDaddy

Live Demo: <https://shopfront-fe.vercel.app/>

Key Features:

- Full-stack E-commerce platform with user authentication (JWT), product browsing, and order management.
- Role-based Admin Dashboard for managing users, products, and orders.
- Secure authentication flows with password reset, image uploads via Cloudinary, and API rate limiting.
- Integrated third-party services (Resend, Cloudinary, Sentry) for emails, monitoring, and logging.
- Built with production-grade architecture and optimized deployments for scalability and performance.

EDUCATION

GALGOTIAS COLLEGE OF ENGINEERING AND TECHNOLOGY		
B.Tech in Electrical Engineering		May 2016 - June 2019
UTKALMANI GOPABANDHU INSTITUTE OF ENGINEERING		
Diploma in Electrical Engineering		May 2013 - June 2016
SARASWATI SHISHU VIDYA MANDIR		
Secondary Education		May 2013
